

CETITEC is one of the leading Gateway-Software producers for the German automotive industry. Our software solutions enable the connectivity of diverse automotive bus-systems such as CAN, MOST, FlexRay and Ethernet and are in use by major automotive manufacturers such as BMW, Daimler, GM, and Porsche as well as automotive suppliers such as Bosch, Continental, JCI and Panasonic. In addition to our connectivity solutions we also produce PC-tools for laboratory simulation and pre-series testing for configuration-, control- and test-solutions.

There will await you a flat management structure, excellent working conditions and a familiar atmosphere.

We currently have an immediate vacancy for a

Software Developer Embedded Software (m/f)

Your responsibilities:

- Conception and development of embedded software for use by our customers in the development of serial software for automotive control devices.
- Development of components and sub-systems from projection through requirement, software design and implementation phases as well as the integration of the software components to customer hardware devices.

Your profile:

- A successful technical university degree or similar technical education
- Sound knowledge of software development
- Good knowledge of C, C++ and UML
- Experience in real-time operating systems
- Strong focus on achieving quality results
- Good command of both English and German (at least English)

If you enjoy working independently and have strong team and communication skills, you are just the person we are looking for!

We look forward to receiving your on-line application with covering letter, europass CV and references.
